Claim Objections

Claims 5-15 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 5-15 have not been further treated on the merits.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by el Kouni (5,670,331).

el Kouni discloses a preparation for determining pyrimidine metabolism comprising a pyrimidine compound in which at least one carbon atom is labeled with an isotope, specifically, ¹⁴C-labeled 5-fluorouracil, see examples 5 and 9 and column 1. Since el Kouni discloses a preparation having the same active ingredient as claimed (i.e., ¹⁴C-labeled fluorouracil), this active ingredient must inherently have the same functional properties (i.e., acting as a substrate for an enzyme) as set forth in claims 2-3. Same compounds must have the properties. Also, the intended use of the claimed invention has not been given patentable weight herein, as intended use must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Van Kuilenburg (Clinical Chemistry, Jan. 2000, PTO-892).

Van Kuilenburg discloses a preparation for determining pyrimidine metabolism comprising a pyrimidine compound in which at least one carbon atom is labeled with an isotope, specifically, ¹⁴C-labeled thymine, see abstract (methods) and materials and methods section, pages 9-10. Since Van

Kuilenburg discloses a preparation having the same active ingredient as claimed (i.e., ^{14}C -labeled thymine), this active ingredient must inherently have the same functional properties (i.e., acting as a substrate for an enzyme) as set forth in claims 2-3. Same compounds must have the properties. Again, as stated above, the intended use of the claimed invention has not been given patentable weight herein.

Conclusion

No claims are allowed at this time.
